

What is Online Linguistic Support? Why I have to take it?

Before the Mobility

• OLS License Allocation to Participants

Students who sign the grant contract are given a license to be sent by the OLS platform to the email address declared in the contract. A registration link is sent to your email address by the OLS system. After completing your registration, it is obligatory to complete the '1st assesment' test until the deadline determined by the system.

Attention! A grant deduction between 5% and 20% is applied to students who do not complete the OLS tests (the grant agreement you will sign has been prepared in accordance with the rules set by the National Agency and the articles have a legal obligation). We kindly ask you to complete this step as soon as possible so that Üsküdar University will be well represented by you in the eyes of National Agency and European Commission.

During the Mobility

Students who have achieved a certain success as a result of the '1st Assesment' test held in English can request an OLS course to improve one of the official languages spoken in the country they will go to (optional). Students who request a course are expected to attend the courses, but there is no sanction.

After the Mobility

After your Erasmus + mobility is completed, the European Union Commission requires you to take the "2nd Assesment" test, in order to observe your personal language skills. If the '1st assesment' test to be received before you leave and the '2nd assesment' tests to be received after your return are not completed, a grant deduction of up to 5% is applied to the total grant amount allocated to you, and the mobility is recorded as incomplete.

! Essential Notes

The '1st assesment' held before the mobility and the '2nd assesment' tests held after the mobility are mandatory, but your low grade does not affect your mobility in any way. The European Union Commission has been made compulsory in order to monitor the language skills and development of the Erasmus program.
